👤 Profile

I am a dedicated and enthusiastic Computer Science undergraduate who has completed my coursework for a Bachelor of Computer Science degree and is currently seeking opportunities to begin my professional career in software engineering. I approach every task with responsibility, determination, and a strong commitment to continuous learning. I am comfortable working both independently and collaboratively, and I enjoy solving real-world problems by designing and developing practical software solutions. I am eager to apply my technical knowledge in a professional environment, contribute to meaningful projects, and grow as a software engineer.

🎓 Education

Bachelor of Computer Science, University of Ruhuna 10/2022 – 10/2025
Sri Lanka

GCE A/L 2020
ICT - A , Combined Mathematics - C , Physics - C

🧠 Technical Skills

Programming Languages

C, Java, JavaScript, PHP

Frameworks & Libraries

SpringBoot, React.js, React Native, Laravel, JavaFX

Database Management

MySQL, PostgreSQL

Software & Tools

GitHub, Postman, VS Code, IntelliJ

Methodologies

Agile

Deployment

Docker, CI/CD , AWS , Jenkins, DigitalOcean

🧩 Soft Skills

- Problem Solving
- Adaptability
- Active Listening
- Fast Learner

👜 Professional Experience

Research & Development Intern - SLTMOBITEL

07/2025 – 12/2025

Contributed to the project ParkEase (Smart Parking Management System)

Sri Lanka

- developed RESTful APIs with **Laravel**
- Designed and modified UIs with **Laravel Blade** .
- Developed a vehicle detection and number plate recognition application using **Python** by integrating YOLO model.
- Configured NodeMCU microcontrollers for automated gate control, and handling a **Linux** mini PC for Python application deployment.

Projects

Job Notifier

08/2026 – Present

Developed a job notification system that scrapes newly posted vacancies from multiple websites and automatically notifies registered users via Email and WhatsApp. Implemented **Jsoup** for web scraping and **RabbitMQ** for asynchronous notification processing through message queues, improving the efficiency and responsiveness of the notification workflow.

Tech Stack: Spring Boot, React.js, PostgreSQL, Jsoup, RabbitMQ
Deployment: Docker

ERP System – Rashmi Tyre Center(Group Project)

11/2024 – 04/2025

Developed a web application to manage inventory, employees, branches, customer credits, rebuild tyre orders, and customer engagement for Rashmi Tyre Center, which was relying on manual processes. The system can send automated notifications to relevant parties with the help of Meta WhatsApp Service. This project covered all steps in SDLC.

Role : Scrum Master, Full stack developer

Tech Stack: SpringBoot, React.Js, PostgreSQL ,

Deployment : SonarQube, CI/CD pipelines, Jenkins, Docker, AWS

Debit Manager (Individual Project)

04/2025 – 06/2025

A web application to track the progress of your debtors. Mark repayments, Generate reports.

Integrated Web3 logins using ether.js

Tech Stack: SpringBoot, React.js, MySQL

Deployment: Jenkins, Docker ,AWS

RuhScheduleEase(Group Project)

05/2024 – 08/2024

Developed an university academic management system with Course registration, timetable generation, lecture re-scheduling, and notification features.

Tech stack: Laravel, InertiaJs, ReactJs & MySQL

Deployment : DigitalOcean
